CLOUD SOLUTIONS

eVantage TECHNOLOGY

CLOUD SOLUTIONS

Cloud computing delivers IT solutions via the internet, which are accessed from web browsers, desktop and mobile applications. The business software and data are stored on servers at a remote secure location.

eVantage Technology understands how important your business and email data is. We can ensure the migration from your existing IT solution to the Cloud is smooth and hassle-free and shall be accessible from anywhere.

1 Reduced Costs

Cloud technology is paid in smaller regular amounts, without huge capital expenditure, saving businesses money. Ongoing maintenance costs are also reduced.

2 Highly Automated

No longer do IT personnel need to worry about keeping software up to date. Maintenance of cloud computing applications is easier, because they do not need to be installed on each user's computer.

3 Flexibility

Cloud computing offers much more flexibility than past computing methods. Clients are able to adjust their requirements as their business grows, and upgrades in storage capacity can be delivered quickly and easily.

4 Increased Storage

Organisations can store more data than on private computer systems.

5 More Mobility

Employees can access information wherever they are, rather than having to remain at their desks. eVantage Technology offers a range of Cloud computing solutions to meet your business needs regardless of your size or complexity.
